

## **Call For Proposal: Clean Air Initiative**

### **Clean Energy Nepal, invites proposals from Youth groups and young individuals for local initiatives to curb local air pollution.**

Clean Energy Nepal (CEN), an NGO, invites proposals from local youths to implement **Clean Air initiatives** (Local initiatives) to curb local air pollution in Dhangadhi under the Safe and Clean Air for all (SAFA) Campaign. SAFA campaign is implemented by CEN through American Spaces in Nepal and is supported by the US Embassy.

The campaign will provide grants to young people (ages 18-35) to work on initiative/s to maintain clean air. The initiative should focus on curbing air pollution and maintaining clean air through Advocacy, technological intervention, Awareness and knowledge dissemination among others.

#### **Key Responsibilities**

- Share the design, plan and detailed activities of the project.
- Carry out the proposed project at the local level in line with the SAFA team.
- To advance the research projects of SAFA, effectively communicate with local stakeholders and local people.
- In all aspects of project execution, maintaining the integrity of project design, and producing high-quality outputs.
- Assist in preparation of reports in coordination with SAFA team and make sure project activities are aligned with project design.
- Regular updates on activities, deliverables, budgets and work plans to SAFA team, and be responsible for conducting working activities independently.
- Support SAFA team in project model related activities in the local area.

#### **Key competencies**

- At least intermediate/10+2 degree.
- Involvement in volunteering or community development works, with special attention to air pollution-related activities.
- Strong capability to conduct and participate in field-related research/work activities.
- Familiar with managing and manipulating spreadsheet data, graphs, tables, and report writing.
- Motivated candidate having time and personnel management skills.
- Be flexible, self-motivating, and capable to manage his/her tasks efficiently.
- Capability to work under pressurized environment.
- Capable to meet deadline of project accomplishment and reporting.
- Should have problem solving, program management and implementation skills and ability to conduct the works independently.
- Capable of handling computer efficiently and presenting progress effectively through virtual/digital platform.

All completed proposals should be sent electronically to ([cen.comms@gmail](mailto:cen.comms@gmail.com) or [info@cen.org.np](mailto:info@cen.org.np)) in a portable document formats (.pdf) and budget in separate excel file with the subject line ***Proposal on Clean Air initiative to curb local air pollution***. Deadline for submission of Proposals is **September 11<sup>th</sup>, 2022, 5:00 p.m.** Proposals received after the deadline will not be considered for evaluation.
